Model	Energy Factor	Cost to Operate*	Annual Savings ¹	Annual Savings ²
2400E/EO	0.80	\$250	\$110	\$151
1600P/PS and 125BO	0.69	\$308	\$52	\$93
1600H	0.80	\$266	\$95	\$135
125FX	0.78	\$273	\$88	\$129
40-gallon tank	0.59	\$361		
75-gallon tank	0.53	\$401		

Liquid Propane

Model	Energy Factor	Cost to Operate*	Annual Savings ¹	Annual Savings ²
2400E/EO	0.80	\$355	\$163	\$221
1600P/PS and 125BO	0.79	\$387	\$131	\$190
1600H	0.84	\$364	\$154	\$213
125FX	0.81	\$377	\$141	\$199
40-gallon tank	0.59	\$518		
75-gallon tank	0.53	\$577		

*The above charts represent approximate energy savings figures based on U.S. Dept. of Energy test method for water heaters. The energy costs used are the 2006 averages as published by DOE - \$1.42/therm for natural gas and \$1.95/gallon for propane.

Annual Savings¹ - Compared to a new 40-gallon tank water heater of the most popular model.

Annual Savings² - Compared to a new 75-gallon tank water heater of the most popular model.
